SKILLS

- Web Development
- Vue Js
- React
- Next Js
- typescript framework
- Cursor IDE
- open ai livekit
- RESTful api product developement
- Firebase,Firestore,Fireauth
- Spring (Spring Boot, Spring Security) tailwind NEXT JS
- fullstack integrated development environment software
- visual studio, visual Basic playground Postman SQL MERN Stack (MongoDB, ExpressJS, ReactJS, NodeJS)

LANGUAGES

- German | Elementary. A1 course Completed
- English | Advanced. IELTS
- Kannada

SUMMARY

Ambitious Master of Science in Computer Science candidate from Paderborn University, currently specializing in Data Science and Security. Brings 1.5 years of intensive **full-stack development experience** from a dynamic tech startup, with proven leadership and expertise in modern stacks (React, Next.js, Vue.js, TypeScript, Spring). Eager to secure a **Werkstudent position** to contribute professional-grade development skills to complex, real-time projects in the NRW tech landscape.

EXPERIENCE

DEVELOPMENT TEAM LEAD

WEBKNOT TECHNOLOGIES PVT. LTD.. BENGALURU, KARNATAKA, India
| Mar 2025 - Aug 2025

1.Key Achievements & Leadership

- **Project Efficiency:** Led cross-functional development teams to deliver high-quality software solutions on time and within budget, resulting in a documented 35% enhancement of overall project efficiency.
- **Stakeholder Alignment:** Collaborated directly with Product Managers and key stakeholders to define project scope, prioritize features, and ensure development efforts were strategically aligned with core business objectives.
- **Code Quality:** Designed and actively enforced coding standards, design patterns, and best practices across the team, significantly improving code quality and long-term maintainability for multiple production projects.

FULL STACK DEVELOPER

WEBKNOT TECHNOLOGIES PVT. LTD.. BENGALURU, KARNATAKA, India
| Mar 2024 - Feb 2025

End-to-End Development: Took ownership of the full software development lifecycle, from initial requirement gathering and system design to implementation, testing, and deployment of features for high-traffic platforms.

Front-End Expertise: Developed highly responsive and performant user interfaces using modern JavaScript frameworks (React/Next.js) and tools (TypeScript, Tailwind CSS), ensuring excellent cross-browser compatibility and user experience (UX).

EDUCATION

M.SC. IN COMPUTER SCIENCE

Universität Paderborn. Paderborn, Germany | Oct 2025 - Present

Currently pursuing an M.Sc. in Computer Science at Paderborn University, with a specialization focus on Data Science and Security.

BACHELOR IN COMPUTER SCIENCE AND ENGINEERING

GLOBAL ACADEMY OF TECHNOLOGY. | Nov 2020 - Jun 2024

PRE UNIVERSITY EDUCATION Kumaran's Comp Pu College.

| Jun 2018 - Mar 2020

PROJECTS

AI-Powered Agentic Interview Platform (Green Light Recruitment)

Designed and developed a complete AI solution for automated recruitment, enabling an agentic AI to conduct human-like interviews, complete with real-time monitoring and a secure web conferencing interface.

- **Scale/Impact:** Currently utilized by over 50 educational institutions and numerous enterprises across the USA, serving two distinct target markets (students and employees).
- **Frontend & User Experience (UX):** Engineered the user-facing web conference interface using Next.js, React, and Tailwind CSS, ensuring a smooth, low-latency, and responsive experience for both the human candidate and the AI agent.
- **AI/Agent Integration:** Implemented the integration of Agentic AI models via Python/Node.js APIs, managing complex, real-time data flow for dynamic, conversational interviews and automated scoring/feedback generation.
- **Real-Time Security & Monitoring:** Developed and deployed a robust monitoring and security system for the video conferencing module, utilizing LiveKit (or WebSockets) for secure, real-time data transmission and encrypted storage of interview records.

Real-Time RBA & Property Management Platform

Led the front-end team for the core service platform of Australia's second-largest household services provider (plumbers, electricians, etc.), responsible for managing all job bookings and work status updates.

- **Technologies:** React, TypeScript, Tailwind CSS, Zustand, PropertyMe API Integration.
- **Access Control Design:** Architected and built a complex Role-Based Access (RBA) system within the application, ensuring granular data security and unique feature sets across all three portals (e.g., real-time job allocation and financial oversight).
- **API Integration:** Developed robust API integration with PropertyMe (a major property management software) to facilitate real-time retrieval of new work orders and automated updates of job completion status.
- **Architectural Efficiency:** Successfully leveraged and expanded upon a highly modular Minimum Viable Product (MVP) framework (which I personally developed in 90 days), ensuring the final product was highly customizable and adaptable for future feature releases.
- **Modern Stack & State Management:** Utilized React, TypeScript, and Tailwind CSS to deliver a type-safe, professional UI, and architected front-end state management using Zustand for predictable and efficient data flow.

HONORS & AWARDS

Jury Panel for Hack-a-League 3.0 (A National Level Hackathon) Global Academy Of Technology

Write here the description...Served as a jury panelist at a 24-hour national-level hackathon, assessing innovative tech solutions from top talent across the country. Contributed to the evaluation process with a focus on creativity, impact, and technical excellence, helping identify standout teams and ideas.

HOSPITALITY HEAD FOR HACK-A-LEAGUE 2.0 (24 Hr, National level hackathon)

Led the hospitality team with effective strategy and planning, ensuring the successful execution of the event through strong leadership and coordination.
